Edge-Lit Graphics

Utilize our vast capabilities and proprietary special effects techniques to get the most out of your day-glow acrylic media

modprint.com

Product Benefits & Highlights

Our edge lit graphics are made with a fluorescent acrylic that uses natural light to illuminate itself, without needing any power input. On this versatile, glow-emitting material we can print, route, drill, laser etch, and form (heat bend into 3D shapes) to create unique and distinct marketing touch points.

Benefits

Cost Effective

Zero UL needs, few limits, versatile manufacturing

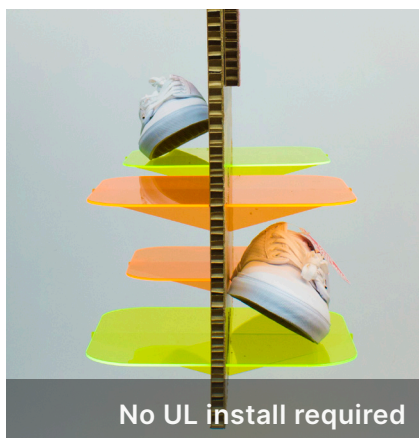

Lower Carbon Footprint

No power, install, or future kWh needed to light media

Print, Cut, Bend, and More

All the tools to hit project budget, vision, and timeline

Highlights

No UL install required

Proprietary Special Effect "Tricks"

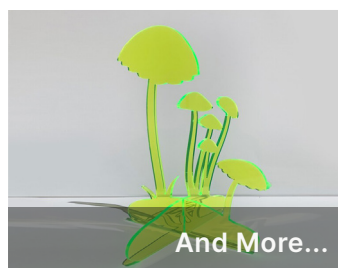

Decor, Graphics, Display Applications

Add LEDs for Bigger Impact

Decor, Graphics, and Display Applications

And More...
